Curriculum Aim: Identify how animals and plants are adapted to suit their environment.

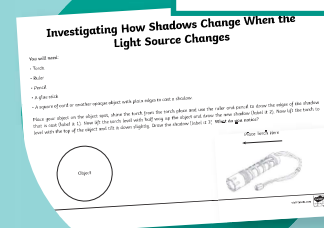

Year 6 Light:

How Shadows Change When the Light Source Changes Worksheet

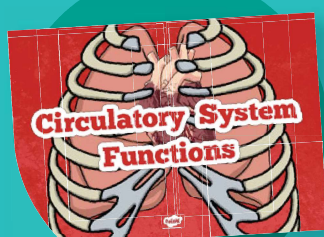

Light is a form of energy that enables us to see the world around us. Light comes from different sources. Our main source of natural light is the sun. Even at night the moon reflects the sun's light creating moonlight. Light can also come from fire, stars, light bulbs and even blue light from our smartphones.

Curriculum Aim: Use the idea that light travels in straight lines to explain shadows.

Thursday

Friday

Year 6 Animals Including Humans: The Circulatory System

A lesson to recap the names and functions of each part of the circulatory system.

Curriculum Aim: Identify and name the main parts of the human circulatory system.
